

```
#include <iostream>

using namespace std;

int main(void) {
    int voltage[5] = {1, 2, 3, 4, 5};
    int v;
    double total = 0, mean;

    for (v = 0; v < 5; v++)
    {
        cout <<"Voltage from List: " <<voltage[v] << endl;
    }
    for(v = 0; v < 5; v++)
        total = total+ voltage [v];

    mean = total/5;

    cout << "Mean of Voltage : " << mean << endl;

    return 0;
}
```
