

```
#include <iostream>
```

```
using namespace std;
```

```
int main(void) {
```

```
    int voltage[5];
```

```
    int v;
```

```
    for (v = 0; v < 5; v++){  
        cout << "Enter a voltage: ";  
        cin >> voltage[v];
```

```
    }
```

```
    for (v=0; v < 5; v++)  
        cout << "Voltage Entered: " << voltage[v] << endl;
```

```
    return 0;
```

```
}
```
