```cpp
#include <iostream>

using namespace std;

int main(void) {
    int x, y;
    double multidArray[3][3];
    cout << endl;

    for(x=0; x < 3; x++)
        for(y=0; y < 3; y++)
        {
            cout << "Enter parameter matrix position X" << x+1;
            cout << ", Y" << y+1 << ":  ";
            cin >> multidArray[x][y];

        }

    return 0;
}
```
